

Airport Safety Solutions

Leading the Runway with Yodock Quality

The Yodock Wall Company pioneered the water-filled barricade industry over 25 years ago. At the forefront of innovation, our reputation continues to soar!

Yodock products meet or exceed the standards implemented by Homeland Security and various Departments of Transportation. In addition, Yodock APC and Model 2001SL are fully compliant with FAA Advisory Circular 150/5370-2E specifications and performance standards.

The Yodock system remains the preferred choice!!!

Yodock APC

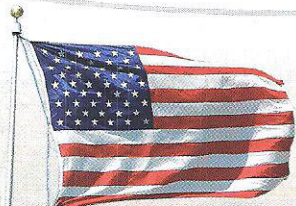

The Yodock Model APC offers many exclusive benefits as a result of its innovative design. Increased visibility is achieved through top and side mount reflective sheeting. Bottom flange mounts allow you to permanently lag or fasten the APCs without ballast. The Yodock APC is exceptionally versatile because of post boots which allow the barricade to be accessorized with delineator posts, fencing or signage.

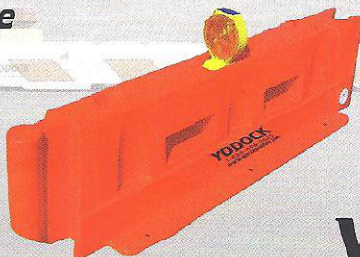

Height:	8"
Width:	12"
Length:	96"
Weight (Empty):	22 Lbs
Weight (Full):	160 Lbs
Capacity:	16 Gallons

Yodock 2001SL

The Yodock Model 2001SL is highly versatile – it can be used for an open runway project as well as accessorized with fencing and used as perimeter security for a closed runway. NCHRP-350 Approved.

Airport Safety Solutions

The Most Versatile of all Airport Barricades

Yodock Metropolitan

The Yodock Metropolitan boasts exceptional versatility, making it the most widely used construction barricade. A wide range of accessories allow for sign support, fencing, lights, posts, and more. When not in use, the Yodock Metropolitan is easily stackable for convenient storage.

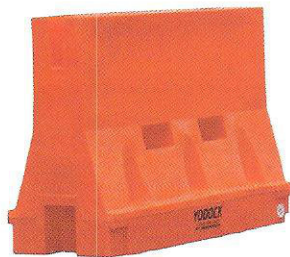

Height:	32"
Width:	18"
Length:	72"
Weight (Empty):	75 Lbs
Weight (Full):	900 Lbs
Capacity:	110 Gallons

Ask for documentation on approvals. Only Yodock offers the most state DOT and Federal FHWA NCHRP-350 approvals in the industry.

Yodock 2001

The Yodock 2001 is the largest in the Yodock airport safety product line. It provides superior safety to personnel, contractors, equipment, and the general public. The light weight design ensures portability and ease of installation.

Height:	46"
Width:	24"
Length:	72"
Weight (Empty):	130 Lbs
Weight (Full):	1500 Lbs
Capacity:	180 Gallons

Accessories

We also offer a wide selection of quality airport-approved accessories like lights, delineator posts, reflective tape, etc.
